ABOUT MYSELF

Software engineer focused on **distributed systems, cloud infrastructure, and applied AI**. I own products end-to-end and build systems that are fast, reliable, and thoughtfully designed. I'm happiest when I'm shipping something real and learning something new.

WORK EXPERIENCE

● **BLUSVN Technologies** Scottsdale, AZ, United States

Lead Software Engineer

27/06/2024 - Current

- Founding engineer on a distributed water-delivery platform; owned the full product lifecycle from architecture to production across backend, infrastructure and ML.
- Engineered high-performance **Golang microservices** with concurrent worker pools and batched notification delivery, validated to handle 50K orders/min.
- Architected and shipped **100+ backend APIs**, reducing end-to-end latency by **40%**.
- Built real-time **ML inference pipelines** for face and ID validation, and **AI-assisted** agent workflows for log analysis that cut manual triage time on production incidents.
- Designed and operated production **AWS/EKS infrastructure**; reduced AWS spend by 12% and led Locust-based load and chaos testing to validate SLOs under peak load.
- Partnered with product managers & stakeholders and led engineering division.

● **Arizona State University** Tempe, AZ, United States

Graduate Teaching Assistant

22/05/2023 - 05/05/2024

- Supported Software Verification, Validation & Testing — **totalling 900+ students**.
- Guided students in unit testing, debugging, code reviews and OOP design principles.
- Led lab sessions, office hours; developed course materials and grading rubrics.

EDUCATION & TRAINING

18/08/2022 - 05/05/2024 Tempe, AZ, United States

● **Master of Science, Computer Science** Arizona State University

Final grade: 4.0/4.0 | Level in EQF: EQF level 7

Allahabad, India

● **Bachelor of Technology, Information Technology** National Institute of Technology

Level in EQF: EQF level 6

SKILLS

Programming Languages (Python, Golang, TypeScript, Java) | Version Control (Git)

BACKEND

Frameworks: React, Node.js, Flask, Cypress, FastAPI, Spring | PostgreSQL | Redis | Kafka

FRONTEND

React | Vite | Javascript (ReactJS, NodeJS, NextJS), HTML, CSS | TypeScript

AI/ML

machine learning | Agentic AI | LangChain/LangGraph | RAG | Evals (RAGAS)

INFRASTRUCTURE

AWS Docker Kubernetes Jenkins | Terraform | Monitoring (Prometheus & Grafana)

PROJECTS

● 08/12/2025 - Current

Agent-Based AI System for Document & Log Analysis

Link <https://github.com/msdokania/agentic-analysis-platform>

● 27/12/2025 - Current

Research Assistant: Hybrid RAG + RAGAS Evaluation · Agentic AI Series Phase 4
